

EXPERIMENT- 9

NAME: ABITHA SHRI.P.S

ROLL NO:240701016

Aim:

To design and implement a registration form that validates user input such as name, email, phone number, and password using HTML, CSS, and JavaScript.

Procedure:

1. Created three files: index.html, style.css, and script.js.
2. Designed a registration form using HTML with fields like name, email, phone, password, and confirm password.
3. Styled the form using CSS to make it neat and readable.
4. Wrote JavaScript code to check the input values.
5. Displayed error messages for invalid inputs.
6. Prevented form submission if any field is incorrect.
7. Run the program by opening index.html in the browser.

Program:

1.Index.html

```
in dex.html > html
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Registration Form</title>
5      <link rel="stylesheet" href="style.css">
6  </head>
7  <body>
8
9  <div class="container">
10 <form id="myForm">
11
12     <h2>Register</h2>
13
14     <input type="text" id="name" placeholder="Name">
15     <span id="nameError" class="error"></span>
16
17     <input type="text" id="email" placeholder="Email">
18     <span id="emailError" class="error"></span>
19
20     <input type="text" id="phone" placeholder="Phone">
21     <span id="phoneError" class="error"></span>
22
23     <input type="password" id="password" placeholder="Password">
24     <span id="passwordError" class="error"></span>
25
26     <input type="password" id="confirmPassword" placeholder="Confirm Password">
27     <span id="confirmError" class="error"></span>
28
29     <button type="submit">Register</button>
30
31 </form>
32 </div>
33
34 <script src="script.js"></script>
35
36 </body>
37 </html>
```

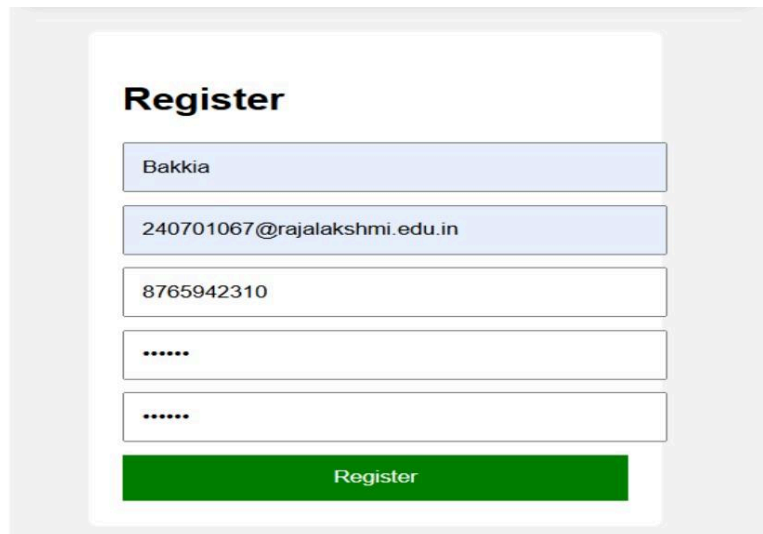

2.style.css

```
css style.css > .error
1  body {
2      font-family: Arial;
3      background: #f4f4f4;
4      display: flex;
5      justify-content: center;
6      align-items: center;
7      height: 100vh;
8  }
9
10 .container {
11     background: white;
12     padding: 20px;
13     width: 300px;
14     border-radius: 5px;
15 }
16
17 input {
18     width: 100%;
19     padding: 10px;
20     margin-bottom: 5px;
21 }
22
23 button {
24     width: 100%;
25     padding: 10px;
26     background: green;
27     color: white;
28     border: none;
29 }
30
31 .error {
32     color: red;
33     font-size: 12px;
34     margin-bottom: 5px;
35     display: block;
36 }
```

3.script.jsOutput:

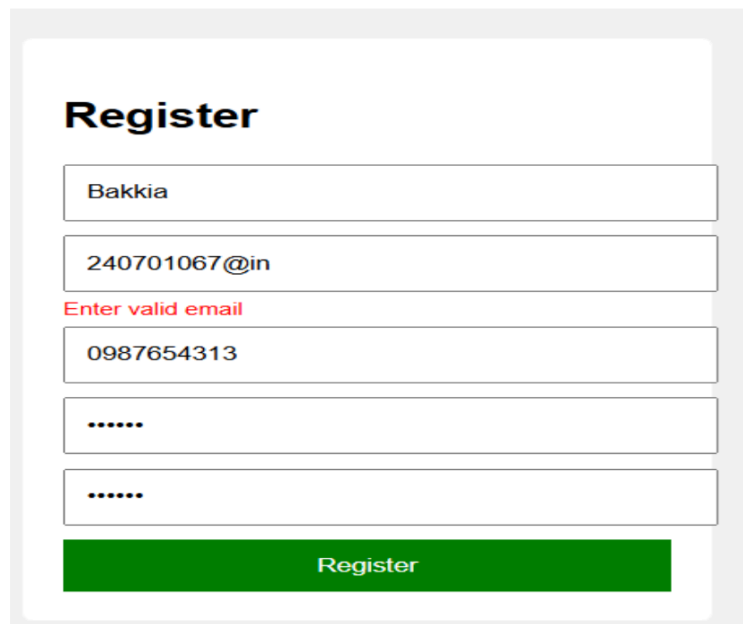

```
JS script.js > ...
1  document.getElementById("myForm").addEventListener("submit", function(e) {
2
3      e.preventDefault();
4
5      let name = document.getElementById("name").value.trim();
6      let email = document.getElementById("email").value.trim();
7      let phone = document.getElementById("phone").value.trim();
8      let password = document.getElementById("password").value;
9      let confirmPassword = document.getElementById("confirmPassword").value;
10
11     let nameError = document.getElementById("nameError");
12     let emailError = document.getElementById("emailError");
13     let phoneError = document.getElementById("phoneError");
14     let passwordError = document.getElementById("passwordError");
15     let confirmPasswordError = document.getElementById("confirmError");
16
17     // Clear errors
18     nameError.textContent = "";
19     emailError.textContent = "";
20     phoneError.textContent = "";
21     passwordError.textContent = "";
22     confirmPasswordError.textContent = "";
23
24     let valid = true;
25
26     // Name validation
27     if (name === "") {
28         nameError.textContent = "Name is required";
29         valid = false;
30     }
31
32     // Email validation (simple)
33     let emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;
34     if (!email.match(emailPattern)) {
35         emailError.textContent = "Enter valid email";
36         valid = false;
37     }
38 }
```

1.For valid mail and phone no

A screenshot of a web registration form titled "Register". The form contains five input fields: a name field with "Bakkia", an email field with "240701067@rajalakshmi.edu.in", a phone number field with "8765942310", and two password fields, both containing six dots. A green "Register" button is at the bottom.

2.For invalid mail3.For invalid phone number

A screenshot of the same "Register" form, but with an error message. The email field now contains "240701067@in", and a red error message "Enter valid email" is displayed below it. The other fields (name, phone number, and passwords) remain the same as in the first screenshot.

Result:

The registration form was successfully created and validated. All input fields were checked correctly, and appropriate error messages were displayed for invalid entries. The form submitted successfully when all inputs were valid
